

ADCP FRAME

ADCP bottom frame

Aqua Vision's gimbaled trawl-resistant **ADCP bottom frame** is designed for self-contained ADCP deployments in any environment.

Features

- Aqua Vision's ADCP bottom frame is designed for use with **Teledyne RD Instruments WorkHorse and Sentinel ADCPs**.
- With a **trawl-resistant frame**, non-intrusive ADCP measurements can be carried out in environments subject to fishing activity.
- A **double axis gimbal** keeps the ADCP vertical. Installation and removal of the ADCP is easy.
- The robust stainless steel frame will survive any environment.

Specifications

- Base: High strength stainless steel – does not affect ADCP compass
- Handling: 4 lifting bails
- Dimensions: Four sided truncated pyramid, 1m x 1m x 0.7m high
- Weight in air: 75 kg
